

Assignment 13

1. First Unique Char in a String

Given a string s , find the first non-repeating character in it and return its index. If it does not exist, return -1.

Test Data 1:

Input: $s = \text{"leetcode"}$

Output: 0

Explanation:

The character 'l' at index 0 is the first character that does not occur at any other index.

Test Data 2:

Input: $s = \text{"loveleetcode"}$

Output: 2

Test Data 3:

Input: $s = \text{"aabb"}$

Output: -1

2. Majority Element

Given an array nums of size n , return the majority element.

The majority element is the element that appears more than $\lfloor n / 2 \rfloor$ times. You may assume that the majority element always exists in the array.

Test Data 1:

Input: $\text{nums} = [3,2,3]$

Output: 3

Test Data 2:

Input: $\text{nums} = [2,2,1,1,1,2,2]$

Output: 2
